FitCampus

A Gym + Habit Tracker built around a student's routine.

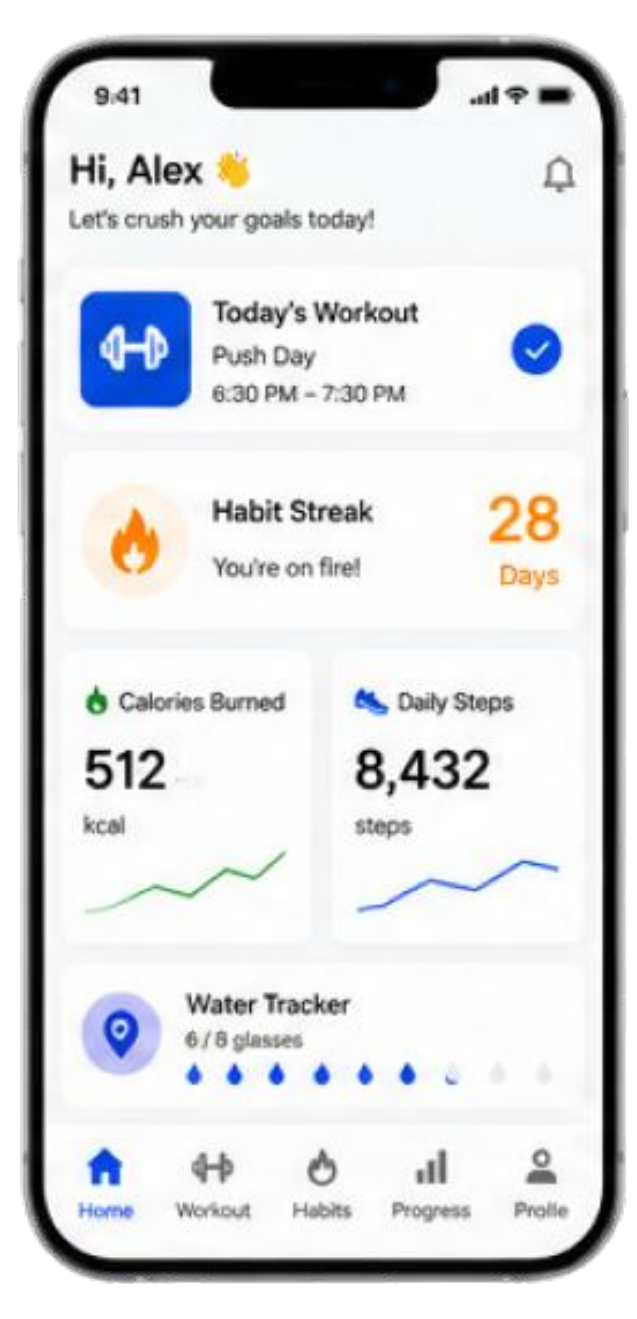
PLAN Smarter Workouts

TRACK Daily habits and Progress

STAY Motivated with Challenges

BUILD Stronger Everyday

1. PRODUCT OVERVIEW



WHAT DOES IT DO?
Helps students plan workouts, track habits, monitor progress and stay consistent around their academic routine.

PAIN IT SOLVES
Lack of time, irregular routine, low motivation and no simple app designed for students.

WHY FITCAMPUS?
Built specifically for students with a perfect blend of workout tracking, habit building and community support.

TOP FEATURES

Smart Gym Slot Booking
Pre-book gym slots to avoid overcrowding and reduce waiting time.

Lifestyle & Progress Tracker
Track diet, sleep, workouts, and progress with smart daily reminders.

Instant Workout Partner
Find compatible workout partners already at the gym through the app.

IDEAL CUSTOMER PROFILE (ICP)

College students (18–24 years) who want to stay fit despite busy academic schedules and need a simple, community-driven fitness platform that makes workouts more accessible, consistent, and engaging.

- ☑ Faces overcrowded gyms, inconsistent fitness habits, and low workout motivation.
- ☑ Looks for convenient fitness solutions with habit tracking and better gym accessibility.
- ☑ Owns a smartphone and is willing to use an affordable student-friendly fitness app.

BUYER PERSONA

Aman
2nd Year B.Tech

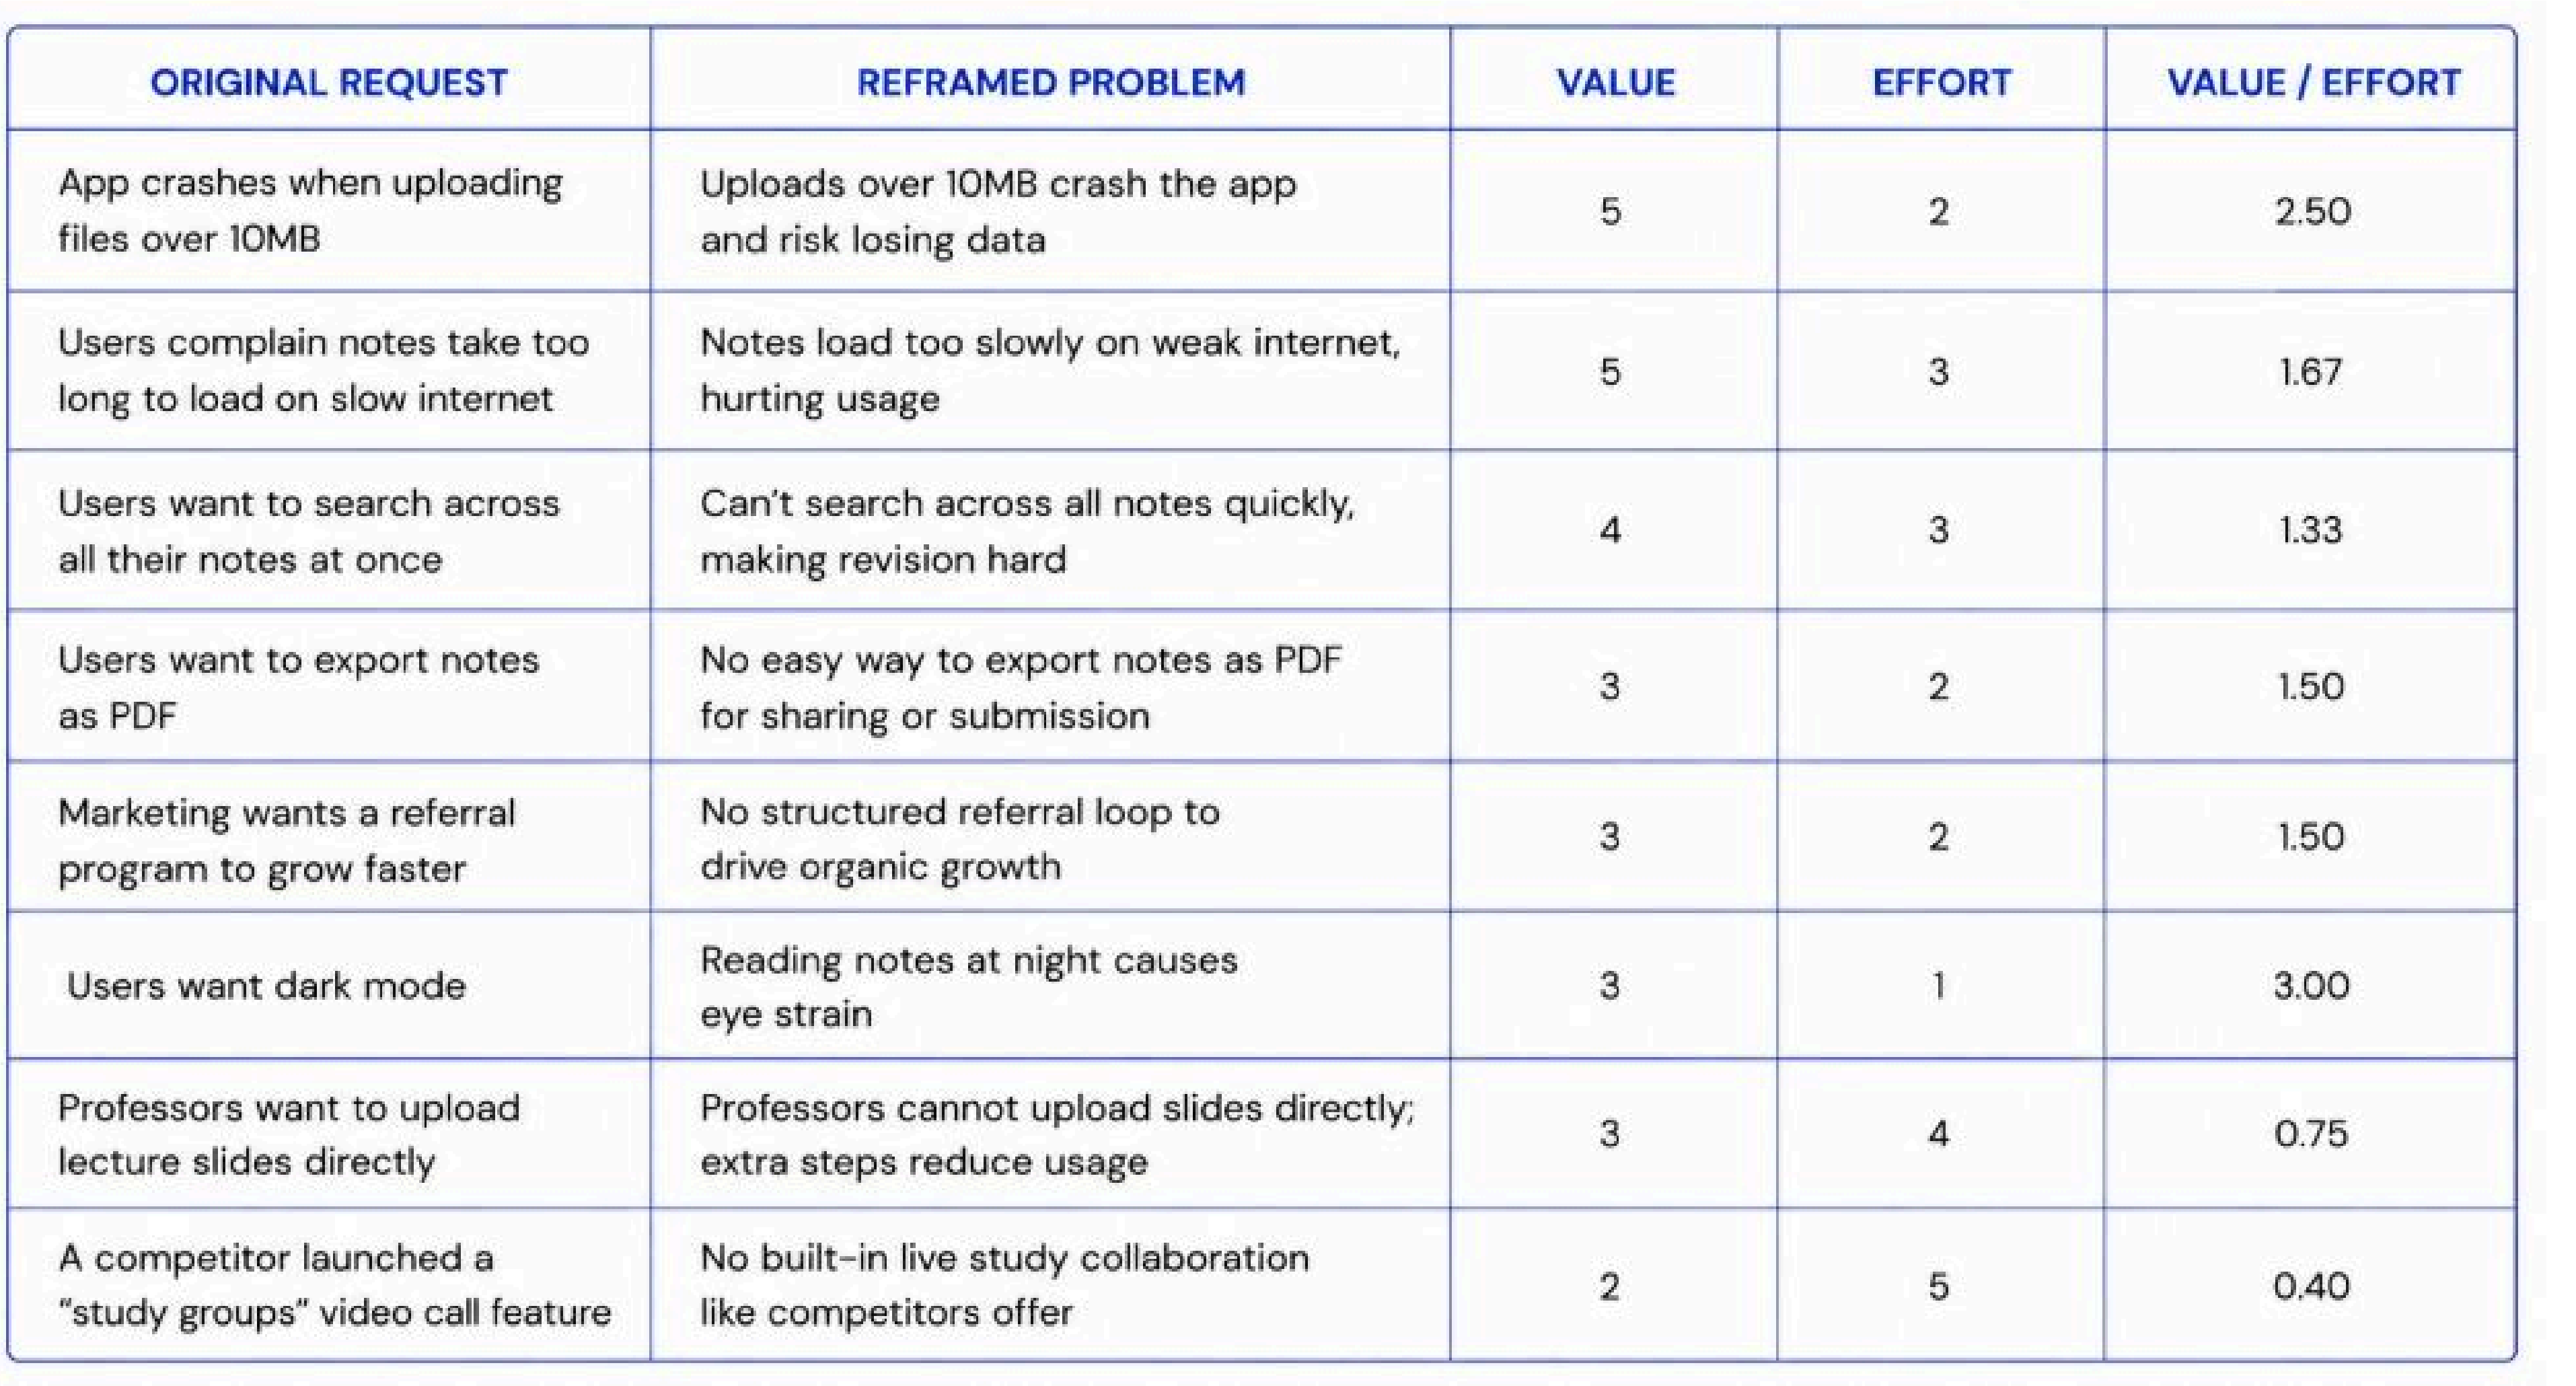
- In-app analytics, notification service.
- In-app survey tool.
- Analytics dashboard, dev time.
- In-app + WhatsApp bot

PART C : Product Roadmap - StudySync



ORIGINAL REQUEST	REFRAMED PROBLEM	VALUE	EFFORT	VALUE / EFFORT
App crashes when uploading files over 10MB	Uploads over 10MB crash the app and risk losing data	5	2	2.50
Users complain notes take too long to load on slow internet	Notes load too slowly on weak internet, hurting usage	5	3	1.67
Users want to search across all their notes at once	Can't search across all notes quickly, making revision hard	4	3	1.33
Users want to export notes as PDF	No easy way to export notes as PDF for sharing or submission	3	2	1.50
Marketing wants a referral program to grow faster	No structured referral loop to drive organic growth	3	2	1.50
Users want dark mode	Reading notes at night causes eye strain	3	1	3.00
Professors want to upload lecture slides directly	Professors cannot upload slides directly; extra steps reduce usage	3	4	0.75
A competitor launched a "study groups" video call feature	No built-in live study collaboration like competitors offer	2	5	0.40

	NOW		NEXT		LATER	
	Problem	Why now	Problem	Why now	Problem	Why now
1	App crashes when uploading files >10MB	Critical reliability issue that disrupts user workflow.	Search across all notes	Improves productivity of students	A competitor launched a study group video call feature	Important but not core until base is strong
2	Notes take too long to load on slow internet	Students often use mobile data or weak Wi-Fi. .	Professors upload lecture slides directly	Adds instructor value and drives wider adaptation in collegees	Marketing wants a referral program to grow faster	Works better once the product value is strong
3	Export notes as PDF	A high-value, low-effort feature that helps students	Dark Mode	Enhances usability,especially for night study sessions		

THE WHY

Our roadmap prioritizes reliability and core usability before growth. With 50K users, fixing crashes, slow loading and search protects retention and improves the everyday study experience. Once the core product is reliable, lower-effort growth features like PDF export and referrals can follow.

CATCH THE TRAP

Looks Small but is Actually Urgent

The 10MB upload crash affects a core workflow. Although it may seem like an edge case, students regularly upload lecture notes and study material, making reliability a priority.

Looks Exciting but is a Distraction

The competitor's Study Groups video feature is tempting, but there is no evidence of demand. Its high effort could distract
